EasyLPS

Easysps: Elevating SPS Coral Growth and Color

LPS corals represent a unique blend of elegance and resilience. Their graceful polyps and stunning fluorescence are the mark of a well-cared-for reef. EasyLPS is a next-generation coral feed designed to meet the specific nutritional needs of these captivating corals, promoting incredible polyp extension, enhanced color, and robust health.

Why Freeze-dried?

Unlike traditional heat-processed foods that strip away vital nutrients, our freeze-drying method locks in the raw, natural goodness of our ingredients. This means your fish receive a diet that is as close to their natural food source as possible, maximizing nutritional value and flavor.

Fueling the Flow: Nutrition for Optimal LPS Corals

At the core of EasyLPS is a firm dedication to quality and coral-specific nutrition. We've meticulously crafted a formula that combines the benefits of a diverse microalgae blend with premium, nutrient-dense aquatic invertebrates. This isn't just a feed; it's a complete nutritional solution designed to boost the full potential of your LPS corals.

- **Promotes Natural Feeding:** The combination of natural ingredients triggers a strong feeding response from your LPS polyps, encouraging them to fully extend and capture the nutrition they need.
- **Enhances Polyp Extension:** The bioavailable proteins and lipids promote the plumpness and extension of polyps, giving your corals a full, healthy appearance.
- **Boosts Fluorescence and Color:** The presence of specific pigments like fucoxanthin naturally deepens and intensifies the vibrant hues and fluorescence of your LPS corals, making their colors pop like never before.
- **Sustains Health:** The complete nutritional profile strengthens your corals' natural defenses, helping them better resist stress and disease.
