The Next Generation of Fish Nutrition  
Where Nutrition Meets Innovation: The Feed They Can't Resist.

Tired of struggling to provide a complete diet to your most selective eaters? Easymasstick is a revolutionary feeding solution that combines the highest quality, naturally sourced ingredients with an innovative application. It's the perfect way to provide a balanced, nutritious diet that is irresistibly to even the most finicky fish.

RESEARCH & DEVELOPMENT

NATURAL INGREDIENTS

FREEZE DRIED

HIGH DIGESTIBILITY

MADE IN EUROPE

## The Stick-On Experience

Simply take a portion of Easymasstick, knead it gently and stick it on a rock, coral skeleton or aquarium glass, preferably in several places, according to the feeding habits of the fish for which it is intended.

- Promotes Natural Grazing.
- Enhances Viewing – Provides an amazing opportunity for you to observe your fish up close as they feed and take unique pictures.

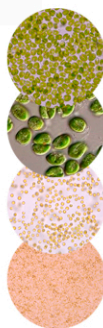

## The Ultimate Protein Source: Naturally Sourced, Not Processed

Unlike conventional fish feeds that rely on processed fish meal—a common ingredient known for its high phosphate content—we've chosen a cleaner path. Fish meal can introduce excessive phosphates into your aquarium, which often leads to unwanted algae blooms and negatively affects the water parameters.

Our solution is a meticulously crafted blend of four distinct freeze-dried microalgae species and freeze-dried aquatic invertebrates. This natural protein source is inherently lower in phosphates, helping to maintain a cleaner, more stable aquatic environment.

### And the Freeze-dried Aquatic invertebrates....

By combining these natural ingredients, we've created a feed that not only provides a comprehensive diet but also actively help preserve the health of your entire aquarium ecosystem.

**Nannochloropsis gaditana:** An EPA powerhouse for a strong immune system.

**Tetraselmis chuii:** A rich source of essential vitamins and amino acids for healthy growth.

**Phaeodactylum tricornutum:** Packed with fucoxanthin for vibrant, intensified coloration.

**Isochrysis galbana:** Delivers vital DHA for superior brain and nervous system development.

## Naturally Attractive: Irresistible to Finicky Eaters

We understand the frustration of dealing with fish that refuse to eat. Easymasstick's unique formulation combines the natural palatability of aquatic invertebrates with the rich, diverse nutrient profile of our algae blend. The enticing scent and flavor are designed to attract even the most stubborn or selective eaters.

- **Appealing to Finicky Eaters:** The soft, compressed texture and natural aroma of our ingredients trigger a strong feeding response.
- **Encourages Natural Grazing:** The stick-on application allows fish to graze naturally, mimicking their wild foraging behaviors. This reduces stress at mealtime and ensures they get the nutrition they need, on their own terms.
- **Visible Results:** You will see a significant improvement in the vibrancy, vitality, and overall health of your fish, proving that quality ingredients make a visible difference.

### Specifications

Sizes	50 g / 90 g / 150 g / 650 g
Use	Stick-on, ready to use.
Ingredients	Aquatic invertebrates, glycerin, macroalgae (Chondrus crispus and Ulva lactuca) and microalgae (Isochrysis galbana, Tetraselmis chuii, Phaeodactylum tricornutum and Nannochloropsis gaditana).
Analytical constituents	Protein (29.85%), Fat (3.30%), Ash (15.47%), Fiber (2.10%) and Moisture (29.35%). Energy: 641 kJ / 153 kcal/100 g.
